(over)

Result of examination:

This report supplements the FBI Laboratory reports dated September 7, October 3 and October 20, 1994. A complete listing of submitted items can be found in those reports.

Bluish-black cotton fibers that are alike microscopically were found in specimens Q1, Q3, Q23 and Q27. These fibers could have originated from the same source. The source of these fibers is unknown to the Laboratory.

A blue cotton fiber microscopically like fibers found in specimen K19 was found in the Q7 specimen. While K19 cannot be eliminated as a possible source of the Q7 fiber, the commonness of this type of fiber limits its evidential value.

Off-white cotton fibers that appear "bloody" were found in or on specimens Q1/Q3, Q7, Q8 and Q47. These fibers are similar to fibers found in specimen K18. While K18 cannot be eliminated as a possible source of the off-white cotton fibers, the commonness of this type of fiber limits its evidential value.

A blue cotton fiber was found on the Q104 glass microscope slide. The source of this fiber could not be determined.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

Please call Supervisory Special Agent [redacted] (202) 324-4344, if you have any questions concerning the results of examinations in this case.

Partial report

Result of Examination:

This report supplements the FBI Laboratory reports dated September 7, October 3 and October 20, 1994. A complete listing of submitted items can be found in those reports.

Bluish-black cotton fibers that are alike microscopically were found in specimens Q1, Q3, Q23 and Q27. These fibers could have originated from the same source. The source of these fibers is unknown to the Laboratory.

A blue cotton fiber microscopically like fibers found in specimen K19 was found in the Q7 specimen. While K19 cannot be eliminated as a possible source of the Q7 fiber, the commonness of this type of fiber limits its evidential value.

Off-white cotton fibers that appear "bloody" were found in or on specimens Q1/Q3, Q7, Q8 and Q47. These fibers are similar to fibers found in specimen K18. While K18 cannot be eliminated as a possible source of the off-white cotton fibers, the commonness of this type of fiber limits its evidential value.

A blue cotton fiber was found on the Q104 glass microscope slide. The source of this fiber could not be determined.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

[redacted] was located at WLA station. [redacted] was located at the LA Coroner's office. Both dogs were located at the residence at 360 N. Rockingham.

FOR DISPOSITION OF EVIDENCE, CONTACT RHD [redacted] (Vannatter)

CLASSIFICATIONS OF BOOKED PROPERTY:

Evidence - Items which are, or may be, related to a crime, or which may either implicate or exonerate a person.
 Non-Evidence - Property other than evidence or an arrestee's excess personal property.

WHO TO BOOK PROPERTY TO:

Evidence - 1. If related to previously booked evidence, book to same person or firm as on original report. (Use original DR and continue item numbers in sequence.) 2. If not related to previously booked evidence, book to arrestee. 3. If no arrestee, book to victim. 4. If no arrestee or victim, book to owner or possessor. 5. If 1, 2, 3, and 4 do not apply, book to Department employee.

Non-Evidence - 1. Book to owner. 2. If ownership cannot be determined, book to finder.

EXCEPTION: When non-evidence is removed from a vehicle, and the owner of the property is unknown, book it to the registered owner. When neither is known, book it to the employee.

REPORT REQUIRED FOR BOOKING EVIDENCE:

The employee booking the evidence shall ensure that the correct property information is forwarded with the evidence. (Two copies of reports are required if the evidence is narcotics or firearms, or if blood or urine is booked within O-VB.)

If the Property Report is an evidence continuation page of an Arrest Report or PIR, staple the Property Report on top of the related Arrest Report (or PIR if no Arrest Report), and forward with evidence.

NOTE: If multiple arrestees are involved, the face sheet stapled to the Property Report should be that of the arrestee to whom the evidence is booked.

EXCEPTIONS TO USE OF COMBINED EVIDENCE / ARREST or PIR:

Use a Property Report completed in its entirety and distributed separately when:

- Evidence is related to previously booked evidence.
- Evidence is booked to other than the primary victim (listed at top) of a multiple victim PIR.
- Reporting more than one license plate (or set of plates). One plate may be reported using the combined procedure. Each additional plate (or set of plates) requires a separate complete Property Report and a separate Vehicle DR number.
- The reporting employee's supervisor determines that a separate complete Property Report would be a more expeditious means of booking the evidence under the given circumstances.

DISTRIBUTION OF COMBINED REPORT (Record Unit): Distribute the Property Report as a page of the related Arrest Report and PIR. In addition to that distribution, forward one copy of the Property Report independently as follows:

- R & I CMRS (with ADRIS print out) if there is no crime report involved; i.e., if the report is a combined arrest/evidence.
- R & I Crime and Property TT Unit Supervisor, if a firearm is booked. Forward this copy without delay.

Result of examination:

This report supplements the FBI Laboratory reports dated September 7, October 3, October 20, November 15 and December 13, 1994. For a complete listing of the submitted items, please refer to those reports.

No hairs microscopically like those comprising specimens K59 and K60 were found on or in items previously submitted from the crime scene, victims or on the leather glove recovered at the O. J. SIMPSON residence.

Blue cotton fibers microscopically like those found in specimen K19 (GOLDMAN jeans) were found in specimens Q1, Q20, Q21 and Q23. While K19 cannot be eliminated as a possible source of the above-mentioned fibers, the common nature of this type of fiber limits its evidential value. It is noted that specimens Q20, Q21 and Q23 represent debris removed from the clothing of RONALD GOLDMAN.

Brown cashmere fibers microscopically like those comprising the lining of the leather glove recovered from the crime scene (Item #37) and the lining of the leather glove recovered from the O. J. SIMPSON residence (Item #9) were found in specimens Q8 (knit hat) and Q23 (GOLDMAN shirt). These fibers could have originated from either glove. It is noted that the left glove (Item #37) and the right glove (Item #9) are alike with respect to color, design, size, construction and fiber composition, and could be a matching pair.

Brown wool fibers, white wool fibers and black wool fibers were found in specimens Q4 and Q5 (40808026). These fibers are microscopically like wool fibers comprising the brown and white "Glenbrook" cap (Q61/Item #27) and, accordingly, could have originated from the cap. It is noted that specimens Q4 and Q5 represent debris removed from the "Glenbrook" cap.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

Partial report

Result of Examination:

This report supplements the FBI Laboratory reports dated September 7, October 3, October 20, November 15 and December 13, 1994. For a complete listing of the submitted items, please refer to those reports.

No hairs microscopically like those comprising specimens K59 and K60 were found on or in items previously submitted from the crime scene, victims or on the leather glove recovered at the O. J. SIMPSON residence.

Blue cotton fibers microscopically like those found in specimen K19 (GOLDMAN jeans) were found in specimens Q1, Q20, Q21 and Q23. While K19 cannot be eliminated as a possible source of the above-mentioned fibers, the common nature of this type of fiber limits its evidential value. It is noted that specimens Q20, Q21 and Q23 represent debris removed from the clothing of RONALD GOLDMAN.

Brown cashmere fibers microscopically like those comprising the lining of the leather glove recovered from the crime scene (Item #37) and the lining of the leather glove recovered from the O. J. SIMPSON residence (Item #9) were found in specimens Q8 (knit hat) and Q23 (GOLDMAN shirt). These fibers could have originated from either glove. It is noted that the left glove (Item #37) and the right glove (Item #9) are alike with respect to color, design, size, construction and fiber composition, and could be a matching pair.

Brown wool fibers, white wool fibers and black wool fibers were found in specimens Q4 and Q5 (40808026). These fibers are microscopically like wool fibers comprising the brown and white "Glenbrook" cap (Q61/Item #27) and, accordingly, could have originated from the cap. It is noted that specimens Q4 and Q5 represent debris removed from the "Glenbrook" cap.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

Result of examination:

This report supplements the FBI Laboratory reports dated September 7, October 3, October 20 and November 15, 1994. For a complete listing of submitted items, please refer to these reports.

No head hairs microscopically like those found in specimens K37 through K52 were found on or in items previously submitted from the victims, crime scene and from specimens Q1 and Q3 (FBI Laboratory reports dated September 7, October 3, and November 15, 1994). A light brown, artificially treated head hair exhibiting Caucasian characteristics was found on specimen Q19 (40808026). A dyed head hair fragment was also found on specimen Q15. This hair and fragment are dissimilar to specimens K1, K4, K40 through K46 and K48 through K50.

White dog hairs microscopically like those found in specimen K54 were found in specimens Q1, Q3, Q7, Q8, Q20, Q21, Q23, Q24 and Q25 (FBI Laboratory number 40808026 S/D UJ QJ). These hairs could have originated from the same source as the K54 dog hairs. A black fur hair microscopically like those found in specimen K53 was found in specimen Q25. This hair could have originated from the same source as the K53 dog hairs. A black animal hair that exhibits both similarities and

differences to hairs found in specimen K53 was found in the Q7 specimen. No conclusion could be reached as to whether or not this hair could have originated from the same source as the K53 dog hairs.

It is noted that dog hairs do not possess enough individual unique microscopic characteristics to identify them to a particular dog to the exclusion of other similar dogs.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

Please call Supervisory Special Agent
[redacted] (202) 324-4344, if you have any questions
concerning the results of examinations in this case.

Final report

Result of Examination:

This report supplements the FBI Laboratory reports dated September 7, October 3, October 20 and November 15, 1994. For a complete listing of submitted items, please refer to these reports.

No head hairs microscopically like those found in specimens K37 through K52 were found on or in items previously submitted from the victims, crime scene and from specimens Q1 and Q3 (FBI Laboratory reports dated September 7, October 3, and November 15, 1994). A light brown, artificially treated head hair exhibiting Caucasian characteristics was found on specimen Q19 (40808026). A dyed head hair fragment was also found on specimen Q15. This hair and fragment are dissimilar to specimens K1, K4, K40 through K46 and K48 through K50.

White dog hairs microscopically like those found in specimen K54 were found in specimens Q1, Q3, Q7, Q8, Q20, Q21, Q23, Q24 and Q25 (FBI Laboratory number 40808026 S/D UJ QJ). These hairs could have originated from the same source as the K54 dog hairs. A black fur hair microscopically like those found in specimen K53 was found in specimen Q25. This hair could have originated from the same source as the K53 dog hairs. A black animal hair that exhibits both similarities and differences to hairs found in specimen K53 was found in the Q7 specimen. No conclusion could be reached as to whether or not this hair could have originated from the same source as the K53 dog hairs.

It is noted that dog hairs do not possess enough individual unique microscopic characteristics to identify them to a particular dog to the exclusion of other similar dogs.

Other Laboratory examinations are in progress and you will be subsequently advised of their results and of the disposition of the submitted items.

- Q197-Q202 Six (6) negatives (C#133295, #1-5)

Result of examination:

This report supplements the FBI Laboratory reports dated September 7, 1994, October 3, 1994, October 20, 1994, December 13, 1994 and January 5, 1995. All of the requested examinations have been completed. For a complete listing of submitted items, please refer to these reports.

Paragraph three (3) of the FBI Laboratory report dated October 20, 1994 should be amended as follows:

It was determined that the footwear impressions represented in the Q48, Q51, Q52, Q54, Q55, Q60, Q61, Q64, Q68, Q70, Q71, Q72, Q74 and Q77 photographs correspond with the left European size 46 "U 2887" sole, K28, and it was determined that the footwear impressions represented in the Q49, Q53, Q56, Q59, Q62, Q65, Q66, Q73, and Q75 photographs correspond with the right European size 46 "U 2887" sole, K29. The European size 46 soles, as represented by K28, K29, K33, and K34, are used on U.S. size 12 shoes, as reflected in the K35 item, and based on industry confirmation and sizing reference information. Shoes which are manufactured for sale in the United States but which are fitted with European size 46 "U 2887" soles are sized and sold as U.S. size 12 shoes.

SHOE PRINT:

Comparisons were made of the footwear impressions depicted in the Q48 through Q77 and Q105 through Q116 photographs with the various "U 2887" SILGA outsoles described as K20 through K31 and K33 through K36. The majority of the discernable footwear impressions depicted in those photographs correspond with the "U 2887" design and specifically,

with the "European size 46" left or right soles. A few of the impressions, as noted below, are too indistinct for detailed comparison.

<u>Q's</u>	<u>PHOTO NUMBER</u>	<u>RESULTS</u>
Q48	P368	LEFT SOLE, SIZE 46
Q49	P369	RIGHT SOLE, SIZE 46
Q50,69,105	P370/P47	SIMILARITIES TO RIGHT SOLE SIZE 46
Q51,70,106	P371/P48	LEFT SOLE, SIZE 46
Q52,71,72,& 107,108,110	P372/P49/P50	LEFT HEEL/SOLE, SIZE 46
Q53,73,111,112	P373/51	RIGHT HEEL/SOLE SIZE 46
Q54,74,113	P374/P52	LEFT HEEL/SOLE SIZE 46
Q55	P375	LEFT HEEL/SOLE SIZE 46
Q56,75,115	P376/P55	RIGHT HEEL/SOLE SIZE 46
Q57,76,114	P377,P56	TOO INDISTINCT
Q58	P378	TOO INDISTINCT
Q59	P379	RIGHT HEEL/SOLE SIZE 46
Q60	P380	LEFT SOLE SIZE 46
Q61,77,109	P381/P57	LEFT HEEL, SIZE 46
Q62	P382	LEFT HEEL/SOLE SIZE 46
Q63	P383	TOO INDISTINCT
Q64	P384	LEFT HEEL SIZE 46
Q65	P385	RIGHT HEEL SIZE 46
Q66	P386	RIGHT HEEL/SOLE SIZE 46
Q67	---	TOO INDISTINCT
Q68	---	LEFT HEEL SIZE 46
Q116	---	SIMILARITIES WITH RIGHT SOLE SIZE 46

The K35 and K36 shoes were provided by UMA/BRUNO MAGLI and remained from the 1990-1992 distribution of these shoes in the United States. K35 is a "U.S. size 12" BRUNO MAGLI "LORENZO" style shoe with a "European size 46" "U 2887" sole. K36 is a "U.S. size 9 1/2" BRUNO MAGLI "LYON" style shoe with a "European size 42" "U 2887" sole. U.S. sales of shoes having the "U 2887" sole design made by SILGA of Italy and distributed through UMA/BRUNO MAGLI were very limited. Total distribution of "U.S. size 12" shoes was only 299 pairs comprised of 190 pairs of the "LORENZO" style, and 109 pairs of the "LYON" style.

The REEBOK shoes of ORENTHAL J. SIMPSON, K55/K56, are sized "US size 12 and European size 46 1/2."

A partial impression on the Q148 envelope corresponds with the "U 2887" sole design. The partial and otherwise limited nature of that impression precluded more detailed comparisons.

Two areas of the lower front side of the legs of the Q102 jeans contain at least two partial footwear impressions which may have been made by footwear with a "U 2887" sole design. In addition, one area of the front of the Q103 dress contains a partial heel impression which shares some similar features with the K28 left heel. Due to the limited nature of those impressions, more detailed comparisons were not made.

A patterned injury on victim NICOLE SIMPSON's back, depicted in the Q82 and Q83 photographs, contains features which have a general correspondence with some of the contour and general size features of the K28/K29 soles; however, there is insufficient detail present in that patterned injury to enable additional interpretation.

Due to the limited detail and nature of the impression areas of the beige colored floor mat (item #33), also represented in the Q100, Q101 and Q173 through Q201 photographs, a positive association could not be made with the "U 2887" sole pattern.

No examinations were conducted of the Q164 through Q169, Q170 through Q172, Q185/Q186 or Q202 photographs.

None of the bloody footwear impressions on the sidewalk, depicted throughout the Q48 through Q77 and Q105 through Q147 photographs, were associated with the design of the K37 or K55/K56 footwear.

Enclosed are photographs representing all of the photographic exposures described as Q100 and Q101, specialized photographs of the Q102 jeans and Q103 dress, an improved visualization of the Q83 photograph, K33, K34 and the ALSO SUBMITTED computer printout, K35, K36, Q87 through Q99, K37; the Q105 through Q147 and Q164 through Q202 photographs, Q163, and the K20 through K31 soles.

The head hairs removed from or found in specimens Q149 through Q159 do not represent a suitable known hair sample. Therefore, these hairs could not be used as a "standard" for comparison with previously recovered hairs.

No hairs microscopically like the known head hair standards from the victims (K1 and K4) were found on specimens Q160 through Q162. The black animal fur hair previously found in specimen Q25 (debris from GOLDMAN's shirt bag) is microscopically like dog hairs recovered from items submitted from RONALD GOLDMAN (Q149 through Q159) and, accordingly, could have originated from the same source.

No apparent interchange of textile fibers was detected between specimens Q160 through Q162 and items previously submitted from the crime scene/victims and from the leather glove recovered outside the residence of the suspect.

The submitted items will be returned separately.

Final report

Result of Examination:

This report supplements the FBI Laboratory reports dated September 7, 1994, October 3, 1994, October 20, 1994, December 13, 1994 and January 5, 1995. All of the requested examinations have been completed. For a complete listing of submitted items, please refer to these reports.

Paragraph three (3) of the FBI Laboratory report dated October 20, 1994 should be amended as follows:

It was determined that the footwear impressions represented in the Q48, Q51, Q52, Q54, Q55, Q60, Q61, Q64, Q68, Q70, Q71, Q72, Q74 and Q77 photographs correspond with the left European size 46 "U 2887" sole, K28, and it was determined that the footwear impressions represented in the Q49, Q53, Q56, Q59, Q62, Q65, Q66, Q73, and Q75 photographs correspond with the right European size 46 "U 2887" sole, K29. The European size 46 soles, as represented by K28, K29, K33, and K34, are used on U.S. size 12 shoes, as reflected in the K35 item, and based on industry confirmation and sizing reference information. Shoes which are manufactured for sale in the United States but which are fitted with European size 46 "U 2887" soles are sized and sold as U.S. size 12 shoes.

Re: ORENTHAL J. SIMPSON - SUBJECT;
NICOLE BROWN SIMPSON - VICTIMS,
RONALD GOLDMAN

Specimens received: November 7, 1994 Field Exam

Specimens:

- ✓ Q148 White bloodstained envelope containing eyeglasses and bearing footwear impressionS(item 39)
- K55 Left REEBOK shoe, size 12, belonging to ORENTHAL J. SIMPSON (item 18)
- K56 Right REEBOK shoe, size 12, belonging to ORENTHAL J. SIMPSON (item 18)
- K57 Left PATAUGAS boot, size 11, belonging to RONALD GOLDMAN (item 78)
- K58 Right PATAUGAS boot, size 11, belonging to RONALD GOLDMAN (item 78)

SHOE PRINT:

Comparisons were made of the footwear impressions depicted in the Q48 through Q77 and Q105 through Q116 photographs with the various "U 2887" SILGA outsoles described as K20 through K31 and K33 through K36. The majority of the discernable footwear impressions depicted in those photographs correspond with the "U 2887" design and specifically, with the "European size 46" left or right soles. A few of the impressions, as noted below, are too indistinct for detailed comparison.

<u>Q's</u>	<u>PHOTO NUMBER</u>	<u>RESULTS</u>
Q48	P368	LEFT SOLE, SIZE 46
Q49	P369	RIGHT SOLE, SIZE 46
Q50, 69, 105	P370/P47	SIMILARITIES TO RIGHT SOLE SIZE 46
Q51, 70, 106	P371/P48	LEFT SOLE, SIZE 46
Q52, 71, 72, & 107, 108, 110	P372/P49/P50	LEFT HEEL/SOLE, SIZE 46
Q53, 73, 111, 112	P373/51	RIGHT HEEL/SOLE SIZE 46
Q54, 74, 113	P374/P52	LEFT HEEL/SOLE SIZE 46
Q55	P375	LEFT HEEL/SOLE SIZE 46
Q56, 75, 115	P376/P55	RIGHT HEEL/SOLE SIZE 46
Q57, 76, 114	P377, P56	TOO INDISTINCT
Q58	P378	TOO INDISTINCT
Q59	P379	RIGHT HEEL/SOLE SIZE 46
Q60	P380	LEFT SOLE SIZE 46
Q61, 77, 109	P381/P57	LEFT HEEL, SIZE 46
Q62	P382	LEFT HEEL/SOLE SIZE 46
Q63	P383	TOO INDISTINCT
Q64	P384	LEFT HEEL SIZE 46
Q65	P385	RIGHT HEEL SIZE 46
Q66	P386	RIGHT HEEL/SOLE SIZE 46
Q67	---	TOO INDISTINCT
Q68	---	LEFT HEEL SIZE 46
Q116	---	SIMILARITIES WITH RIGHT SOLE SIZE 46

The K35 and K36 shoes were provided by UMA/BRUNO MAGLI and remained from the 1990-1992 distribution of these shoes in the United States. K35 is a "U.S. size 12" BRUNO MAGLI "LORENZO" style shoe with a "European size 46" "U 2887" sole. K36 is a "U.S. size 9 1/2" BRUNO MAGLI "LYON" style shoe with a "European size 42" "U 2887" sole. U.S. sales of shoes having the "U 2887" sole design made by SILGA of Italy and distributed through UMA/BRUNO MAGLI were very limited. Total distribution of "U.S. size 12" shoes was only 299 pairs comprised of 190 pairs of the "LORENZO" style, and 109 pairs of the "LYON" style.

The REEBOK shoes of ORENTAL J. SIMPSON, K55/K56, are sized "US size 12 and European size 46 1/2."

A partial impression on the Q148 envelope corresponds with the "U 2887" sole design. The partial and otherwise limited nature of that impression precluded more detailed comparisons.

Two areas of the lower front side of the legs of the Q102 jeans contain at least two partial footwear impressions which may have been made by footwear with a "U 2887" sole design. In addition, one area of the front of the Q103 dress contains a partial heel impression which shares some similar features with the K28 left heel. Due to the limited nature of those impressions, more detailed comparisons were not made.

A patterned injury on victim NICOLE SIMPSON's back, depicted in the Q82 and Q83 photographs, contains features which have a general correspondence with some of the contour and general size features of the K28/K29 soles; however, there is insufficient detail present in that patterned injury to enable additional interpretation.

Due to the limited detail and nature of the impression areas of the beige colored floor mat (item #33), also represented in the Q100, Q101 and Q173-Q201 photographs, a positive association could not be made with the "U 2887" sole pattern.

No examinations were conducted of the Q164-Q169, Q170-Q172, Q185/Q186 or Q202 photographs.

None of the bloody footwear impressions on the sidewalk, depicted throughout the Q48-Q77 and Q105 through Q147 photographs, were associated with the design of the K37 or K55/K56 footwear.

Enclosed are photographs representing all of the photographic exposures described as Q100 and Q101, specialized photographs of the Q102 jeans and Q103 dress, an improved visualization of the Q83 photograph, K33, K34 and the ALSO SUBMITTED computer printout, K35, K36, Q87 through Q99, K37; the Q105 through Q147 and Q164 through Q202 photographs, Q163, and the K20 through K31 soles.

FOR DISPOSITION OF EVIDENCE, CONTACT RHD (Dets. VanAffer, [redacted])						

b6
b7c**CLASSIFICATIONS OF BOOKED PROPERTY:**

Evidence - Items which are, or may be, related to a crime, or which may either implicate or exonerate a person.

Non-Evidence - Property other than evidence or an arrestee's excess personal property.

WHO TO BOOK PROPERTY TO:

Evidence - 1. If related to previously booked evidence, book to same person or firm as on original report. (Use original DR and continue item numbers in sequence.) 2. If not related to previously booked evidence, book to arrestee. 3. If no arrestee, book to victim. 4. If no arrestee or victim, book to owner or possessor. 5. If 1, 2, 3, and 4 do not apply, book to Department employee.

Non-Evidence - 1. Book to owner. 2. If ownership cannot be determined, book to finder.

EXCEPTION: When non-evidence is removed from a vehicle, and the owner of the property is unknown, book it to the registered owner. When neither is known, book it to the employee.

REPORT REQUIRED FOR BOOKING EVIDENCE:

The employee booking the evidence shall ensure that the correct property information is forwarded with the evidence. (Two copies of reports are required if the evidence is narcotics or firearms, or if blood or urine is booked within O-VB.)

If the Property Report is an evidence continuation page of an Arrest Report or PIR, staple the Property Report on top of the related Arrest Report (or PIR if no Arrest Report), and forward with evidence.

NOTE: If multiple arrestees are involved, the face sheet stapled to the Property Report should be that of the arrestee to whom the evidence is booked.

EXCEPTIONS TO USE OF COMBINED EVIDENCE / ARREST or PIR:

Use a Property Report completed in its entirety and distributed separately when:

- * Evidence is related to previously booked evidence.
- * Evidence is booked to other than the primary victim (listed at top) of a multiple victim PIR.
- * Reporting more than one license plate (or set of plates). One plate may be reported using the combined procedure. Each additional plate (or set of plates) requires a separate complete Property Report and a separate Vehicle DR number.
- * The reporting employee's supervisor determines that a separate complete Property Report would be a more expeditious means of booking the evidence under the given circumstances.

DISTRIBUTION OF COMBINED REPORT (Record Unit): Distribute the Property Report as a page of the related Arrest Report and PIR. In addition to that distribution, forward one copy of the Property Report independently as follows:

- * R & I CMRS (with ADRIS print out) if there is no crime report involved; i.e., if the report is a combined arrest/evidence.
- * R & I Crime and Property TT Unit Supervisor, if a firearm is booked. Forward this copy without delay.

This evidence will remain in the custody of the FBI Laboratory while the examinations are being conducted. Following completion of the examinations, a report containing the results of the examinations and the disposition of the evidence will be forwarded to your department. If evidence is picked up personally, your representative should identify it with the Laboratory case number(s) assigned in the FBI Laboratory report.

Re: ORENTHAL J. SIMPSON - SUSPECT;
NICOLE SIMPSON AND RONALD GOLDMAN -
VICTIMS;
HOMICIDE

Specimens received: January 20, 1995

Specimens:

Q-203 Piece of paper with footwear impressions

Results of examination:

Q203 and an electrostatic lift of Q203 have been photographed. Copies of those photographs, the Q203 item and Q203 lift are returned herewith.

No footwear impressions of the "U 2887" SILGA design, represented by the K22 through K31 items, were present on the Q203 item.

Remarks:

For your information, Supervisory Special Agent [redacted] of the FBI Laboratory traveled to the SILGA GOMMA shoe factory in Civitina Marche, Italy on January 23, 1995 where he examined the "U2887" molds and obtained left and right soles molded in the European size 46 "U2887" mold. These soles were then taken the same day to the Calzaturificio "4C" factory where they were attached to BRUNO MAGLI uppers on the "4C" American size 12 lasts and made into a pair of BRUNO MAGLI shoes, American size 12. These shoes were built in an identical manner to and on the same size 12 lasts as the BRUNO MAGLI shoes of this design which had been previously manufactured by these same factories for shipment to UMA/BRUNO MAGLI and distribution in the United States. The pair of BRUNO MAGLI shoes and the American size 12 shoe lasts were turned over to a representative of the Los Angeles Police Department on February 13, 1995. Photographs of the size 12 BRUNO MAGLI shoes and lasts, and photographs taken at the SILGA and "4C" factories are enclosed herewith.

b7c

Result of examination:

This report supplements the FBI Laboratory reports to your office dated September 7, 1994, October 3, 1994, October 20, 1994, November 15, 1994, December 13, 1994, January 5, 1995, January 13, 1995 and January 20, 1995. For a complete listing of the submitted items, please refer to these reports. Paragraphs three and four of page 3 of the FBI Laboratory report dated January 13, 1995, should be amended as follows:

It was determined that the footwear impressions represented in the Q48, Q51, Q52, Q54, Q55, Q60, Q61, Q64, Q65, Q68, Q70, Q71, Q72, Q74 and Q77 photographs correspond with the left European size 46 "U 2887" sole, K28, and it was determined that the footwear impressions represented in the Q49, Q53, Q56, Q59, Q62, Q66, Q73, and Q75 photographs correspond with the right European size 46 "U 2887" sole, K29. The European size 46 soles, as represented by K28, K29, K33, and K34, are used on U.S. size 12 shoes, as reflected in the K35 item, and based on industry confirmation and sizing reference information. Shoes which are manufactured for sale in the United States but which are fitted with European size 46 "U 2887" soles are sized and sold as U.S. size 12 shoes.

SHOE PRINT:

Comparisons were made of the footwear impressions depicted in the Q48 through Q77 and Q105 through Q116 photographs with the various "U 2887" SILGA outsoles described as K20 through K31 and K33 through K36. The majority of the discernable footwear impressions depicted in those photographs correspond with the "U 2887" design and specifically, with the "European size 46" left or right sole. A few of the impressions, as noted below, are too indistinct for detailed comparison.

<u>Q's</u>	<u>LETTER</u>	<u>PHOTO #</u>	<u>RESULTS</u>
Q48	A	P368	LEFT SOLE, SIZE 46
Q49	B	P369	RIGHT SOLE, SIZE 46

Q65	X	P385	LEFT HEEL/SOLE SIZE 46
Q66	Y	P386	RIGHT HEEL/SOLE SIZE 46
Q67	---	---	TOO INDISTINCT
Q68,	---	---	LEFT HEEL SIZE 46
Q116	---	---	SIMILARITIES WITH RIGHT SOLE SIZE 46

SHOE PRINT: (Q117 through Q147)

Q118 depicts a partial impression as depicted in Q67. That impression reflects some similar design features to the U2887 design but is too indistinct to enable further comparison.

Q119, Q120 and Q121 depict the same left heel impression described as Q68.

Q122 depicts multiple impressions on steps. On the second step is an impression previously described as Q48(A). On the third step is an impression previously described as Q49(B). To the left of Q49(B) are two faint impressions which share some limited design similarity with the U2887 sole design but are too indistinct to enable further comparison.

Q123 depicts multiple impressions, previously described as Q50(C), Q51(D), Q52(E) and Q53(F). Q124 depicts multiple impressions, previously described as Q52(E), Q53(F), Q54(G), Q55(H) and Q56(I). Q125 depicts multiple impressions previously described as Q54(G), Q55(H), Q56(I), Q57(J) and Q58(K). Q126 depicts impressions previously described as Q65(X) and Q66(Y).

Q130 through Q134, Q145 and Q146 collectively depict steps which include impressions AH (Q131), AI, AJ(132), AK, AL (Q133), AM, AN (Q146) and AO (Q145). Additional impressions on the edges of steps are depicted in Q137 through Q143. These impressions are too limited to enable a meaningful comparison.

Photographs Q117, Q127, Q128, Q129, Q135, Q136, Q144 and Q147 are general scene photographs which do not depict any additional detail with regard to the footwear impressions.

EDTA, a blood preservative, was identified on stains prepared from the K67 and K68 blood samples from NICOLE SIMPSON and ORENTAL J. SIMPSON, respectively. No EDTA was identified in the bloodstains removed from the Q204 swabbing of the rear gate at the crime scene and from the Q206 sock. Traces of EDTA were detected on the stained and unstained cutting from the victim's dress.

The analyses were performed on approximately two by five millimeter samples. The procedure was designed to identify EDTA in bloodstains of approximately one by one millimeter.

After the samples were cut, they were placed in a small amount of water to extract EDTA. After 40 minutes the samples were filtered and analyzed by liquid chromatography/mass spectrometry.

The items submitted in FBI Laboratory number 50217009 are being retained in the Laboratory.

This evidence will remain in the custody of the FBI Laboratory while the examinations are being conducted. Following completion of the examinations, a report containing the results of the examinations and the disposition of the evidence will be forwarded to your department. If evidence is picked up personally, your representative should identify it with the Laboratory case number(s) assigned in the FBI Laboratory report.

RECEIVED

Director
Federal Bureau of Investigation

Remarks:

For your information, SSA [redacted] of the FBI Laboratory traveled to the SILGA GOMMA shoe factory in Civitinoval Marche, Italy on January 23, 1995 where he examined the "U2887" molds and obtained left and right soles molded in the European size 46 "U2887" mold. These soles were then taken the same day to the Calzaturificio "4C" factory where they were attached to BRUNO MAGLI uppers on the "4C" American size 12 lasts and made into a pair of BRUNO MAGLI shoes, American size 12. These shoes were built in an identical manner to and on the same size 12 lasts as the BRUNO MAGLI shoes of this design which had been previously manufactured by these same factories for shipment to UMA/BRUNO MAGLI and distribution in the United States. The pair of BRUNO MAGLI shoes and the American size 12 shoe lasts were turned over to a representative of the Los Angeles Police Department on February 13, 1995. Photographs of the size 12 BRUNO MAGLI shoes and lasts, and photographs taken at the SILGA and "4C" factories are enclosed herewith.

b6
b7c

Results of examinations:

This report supplements the FBI Laboratory report dated January 13, 1995. Paragraph three and four of page 3 of that report should be amended as follows:

It was determined that the footwear impressions represented in the Q48, Q51, Q52, Q54, Q55, Q60, Q61, Q64, Q65, Q68, Q70, Q71, Q72, Q74 and Q77 photographs correspond with the left European size 46 "U 2887" sole, K28, and it was determined that the footwear impressions represented in the Q49, Q53, Q56, Q59, Q62, Q66, Q73, and Q75 photographs correspond with the right European size 46 "U 2887" sole, K29. The European size 46 soles, as represented by K28, K29, K33, and K34, are used on U.S. size 12 shoes, as reflected in the K35 item, and based on industry confirmation and sizing reference information. Shoes which are manufactured for sale in the United States but which are fitted with European size 46 "U 2887" soles are sized and sold as U.S. size 12 shoes.

SHOE PRINT:

Comparisons were made of the footwear impressions depicted in the Q48 through Q77 and Q105 through Q116 photographs with the various "U 2887" SILGA outsoles described as K20 through K31 and K33 through K36. The majority of the discernable footwear impressions depicted in those photographs correspond with the "U 2887" design and specifically, with the "European size 46" left or right soles. A few of the impressions, as noted below, are too indistinct for detailed comparison.

<u>Q's</u>	<u>LETTER</u>	<u>PHOTO #</u>	<u>RESULTS</u>
Q48	A	P368	LEFT SOLE, SIZE 46
Q49	B	P369	RIGHT SOLE, SIZE 46
Q50,69 & 105	C	P370/P47	SIMILARITIES TO RIGHT SOLE SIZE 46
Q51,70,106	D	P371/P48	LEFT SOLE, SIZE 46
Q52,71,72,& 107,108,110	E	P372/P49/P50	LEFT HEEL/SOLE SIZE 46
Q53,73,111 & 112	F	P373/51	RIGHT HEEL/SOLE SIZE 46
Q54,74,113	G	P374/P52	LEFT HEEL/SOLE SIZE 46
Q55	H	P375	LEFT HEEL/SOLE SIZE 46
Q56,75,115	I	P376/P55	RIGHT HEEL/SOLE SIZE 46
Q57,76,114	J	P377,P56	TOO INDISTINCT
Q58	K	P378	TOO INDISTINCT
Q59	L	P379	RIGHT HEEL/SOLE SIZE 46
60	M	P380	LEFT SOLE SIZE 46
Q61,77,109	N	P381/P57	LEFT HEEL, SIZE 46
Q62	O	P382	RIGHT HEEL/SOLE SIZE 46
Q63	P	P383	TOO INDISTINCT
Q64	S	P384	LEFT HEEL SIZE 46
Q65	X	P385	LEFT HEEL/SOLE SIZE 46
Q66	Y	P386	RIGHT HEEL/SOLE SIZE 46
Q67	---	---	TOO INDISTINCT
Q68,	---	---	LEFT HEEL SIZE 46
Q116	---	---	SIMILARITIES WITH RIGHT SOLE SIZE 46

SHOE PRINT: (Q117 through Q147)

Q118 depicts a partial impression as depicted in Q67. That impression reflects some similar design features to the U2887 design but is too indistinct to enable further comparison.

Q119, Q120 and Q121 depict the same left heel impression described as Q68.

Q122 depicts multiple impressions on steps. On the second step is an impression previously described as Q48(A). On the third step is an impression previously described as Q49(B). To the left of Q49(B) are two faint impressions which share some limited design similarity with the U2887 sole design but are too indistinct to enable further comparison.

Q123 depicts multiple impressions, previously described as Q50(C), Q51(D), Q52(E) and Q53(F). Q124 depicts multiple impressions, previously described as Q52(E), Q53(F), Q54(G), Q55(H) and Q56(I). Q125 depicts multiple impressions previously described as Q54(G), Q55(H), Q56(I), Q57(J) and Q58(K). Q126 depicts impressions previously described as Q65(X) and Q66(Y).

Q130 through Q134, Q145 and Q146 collectively depict steps which include impressions AH (Q131), AI, AJ(132), AK, AL (Q133), AM, AN (Q146) and AO (Q145). Additional impressions on the edges of steps are depicted in Q137 through Q143. These impressions are too limited to enable a meaningful comparison.

Photographs Q117, Q127, Q128, Q129, Q135, Q136, Q144 and Q147 are general scene photographs which do not depict any additional detail with regard to the footwear impressions.

Fourier Transform Infrared (FT-IR) Spectroscopy - FBI

Lab Number: 50217009

Specimens: Q205: Two types of dark fibers

Request: Qualitative analysis

Methods: A small piece of each fiber type was flattened with a metal roller and placed on a KBr window for analysis by transmission. A Nicolet 710 FT-IR spectrometer and a Nic-Plan IR microscope were used for the analyses. 128 scans were coadded for each spectrum at 4 cm^{-1} resolution.

Results: The IR spectrum of fiber "A" is consistent with that of nylon 6. The spectrum of fiber "B" is consistent with the presence of protein and acrylonitrile and was not further identified.

FT-IR: SPEC EXAM

The following procedure has been reviewed and approved for use by personnel of the Chemistry-Toxicology Unit (CTU) of the FBI Laboratory. This action does not signify this procedure to be mandated to the extent that it precludes the use of variations of this procedure or different procedures for accomplishing the desired assay. Physical and personnel resources, technological change, and examiner preference (within the bounds of good laboratory technique and quality control) determine what examination procedures are appropriate and/or acceptable for a given set of circumstances as encountered in the CTU.

CHEMICAL IONIZATION TANDEM MASS SPECTROMETRY**

PROCEDURE:

1. To properly labelled 16 x 150mm screw-top tubes add ^{1.0}~~2.5~~ mLs of control or questioned specimen (2.5 mLs fluid or 2.5 g of tissue homogenate).
2. Add ¹⁰⁰~~250~~ _{0.10} μLs each of D₃-Amphetamine and D₅-Methamphetamine (0.25 μg; 100 ng/mL) working solutions. Bring to 5 mLs with distilled water. Add 10 mLs of ethyl ether to each tube. Extract for 5 minutes.
3. Add 10 drops of 5N NaOH. Extract for an additional 20 minutes. Centrifuge.
4. a) **FOR ALL BIOLOGICALS EXCEPT TISSUES:** Transfer organic (top) layer to a clean screw-top tube. Add 5 mLs of 0.5N H₂SO₄ and extract for 20 minutes. Centrifuge.
b) **FOR TISSUES:** Transfer organic (top) layer to a clean screw-top tube. Add 5 mLs of 0.1 N NaOH and wash ether for 10 minutes. Transfer ether to a clean test tube. Add 5 mLs of 0.5N H₂SO₄ and extract for 20 minutes. Centrifuge.
5. Aspirate off the organic (top) layer. Transfer acid layer to clean screw-top tube. Add 1 mL of 5N NaOH. Check pH. Add 3 mLs of chloroform. Gently vortex for two minutes. Centrifuge.
6. Dry and filter chloroform (bottom) layer through Na₂SO₄ and glass wool. Collect filtrate in a 5-mL test tube. ADD TWO (2) DROPS 1N HCL/MEOH (1:1). Carefully vortex.
7. Evaporate to dryness.
8. Reconstitute with 15 μLs MeOH and split into two probe cups.

4/4/95

b6
b7c

Evaporate to dryness in 90°C oven. DO NOT LET EXTRACTS STAY IN OVEN LONGER THAN NECESSARY.

9. The residues are assayed using solids probe chemical ionization tandem mass spectrometry operated in parent-ion and neutral-loss modes.

INSTRUMENTATION CONDITIONS:

The following instrumental conditions are used in the *qualitative and quantitative assay for methamphetamine* and the *qualitative assay for amphetamine*:

Parents of 91 m/z (Collision offset -10 Volts):

Quad 1: Scan ^{134 157} 130-158, 0.5 second scan
Quad 2: Collision Induced Dissociation (Argon)
Quad 3: Set mass 91

These conditions are loaded automatically using the ICL procedure "METH".

Probe: 30 -> 375°C (0.43 minute)
375°C (2.00 minutes)

Methamphetamine parents are 150 m/z.
D₅-Methamphetamine parent is 155 m/z.
Amphetamine parents are 136 m/z.

The following instrumental conditions are used for the *confirmation of methamphetamine*:

Daughters of 150 m/z (Collision offset -20 Volts):

Quad 1: Set mass 150
Quad 2: Collision Induced Dissociation (Argon)
Quad 3: Scan 80 -> 153, 1 second scan

Probe: As above

Methamphetamine daughters are 91 and 119 m/z.

The following instrumental conditions are used in the *quantitative assay for amphetamine*:

Neutral Loss 17 m/z (Collision offset -10 Volts):

Quad 1: Scan 134 -> 140, 1 second scan
Quad 2: Set Mass 17 m/z

Quad 3: 117 -> 123, 1 second scan

These conditions are loaded automatically using the ICL procedures ".NEU"; ".SM=17"; "S 134,140,1"

Probe: As above

Amphetamine's M+ is 136 m/z.
D₃-Amphetamine's M+ is 139 m/z.

Daughters of 136 m/z (Collision offset -10 Volts):

Quad 1: Set mass 136
Quad 2: Collision Induced Dissociation (Argon)
Quad 3: Scan 80 -> 140, 1 second scan

Probe: As above

Amphetamine daughters are 91 and 119 m/z.

QUANTITATION:

The ion abundances for amphetamine (136 m/z) and D₃-amphetamine (139 m/z) are compared for quantitation of amphetamine.

$$\frac{A_{136}}{A_{139}} \times [D_3\text{-Amphetamine}] = [\text{Amphetamine}]$$

The ion abundances for methamphetamine (150 m/z) and D₅-methamphetamine (155 m/z) are compared for quantitation of methamphetamine.

$$\frac{A_{150}}{A_{155}} \times [D_5\text{-Methamphetamine}] = [\text{Methamphetamine}]$$

This Report Is Furnished For Official Use Only

RESUBMITTED ITEMS FROM FBI LABORATORY NUMBER 40929001 S UJ:

SPECIMENS Q84 THROUGH Q86

GLASS MICROSCOPE SLIDES AND PILLBOXES FROM SPECIMENS Q84 THROUGH Q86

RESUBMITTED ITEMS FROM FBI LABORATORY NUMBER 40808026 S UJ:

SPECIMENS Q3, Q4, Q7, Q8A, Q8B, Q8C, K7, Q20 THROUGH Q26, Q35 THROUGH Q37

EIGHTY-SEVEN (87) MICROSCOPE SLIDES FROM Q3 THROUGH Q26, Q28 THROUGH Q37, Q47, K7 AND K17

TWELVE (12) PILLBOXES FROM SPECIMENS Q20 THROUGH Q25, Q33, Q34 AND Q47

Result of examination:

No head hairs microscopically like those found in specimen K69 were found on or in items previously submitted from the crime scene/victims (FBI Laboratory report dated September 7, 1994).

No human hairs were found on specimens Q208 through Q217.

The submitted items were returned to Investigator on April 17, 1995.

Re: PEOPLE V. ORENTHAL J. SIMPSON; CASE NO. BA097211

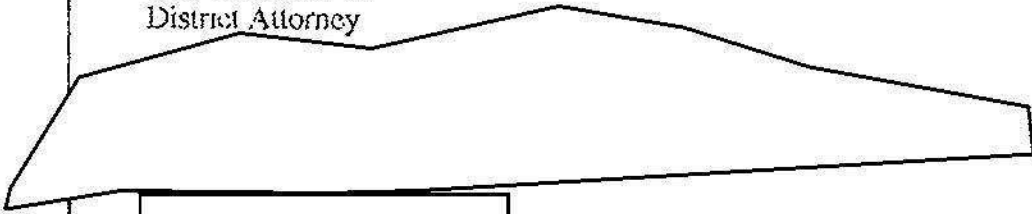

Dear Mr. [Redacted]

Based upon my review of our documents the following is a list of items for which we do not presently have final test result reports: Q4, Q5, Q6, Q9, Q15, Q19, Q24, Q25, Q27, Q80, Q81, Q84, Q85, and Q86. In addition, we do not have any reports concerning F.B.I. laboratory testing of L.A.F.D. item #285. It would be of tremendous assistance to me if you could forward to this office any final reports you have pertaining to the aforementioned items. If testing has not been performed, I would appreciate that information as well.

I apologize for any inconvenience this request may cause you. Should you have any questions please contact me at [Redacted] Thank you for your cooperation.

Yours truly,

GIL GARCETTI

Dear [REDACTED]

The results of hair and fiber examinations conducted on evidence submitted in your case entitled PEOPLE V. ORENTHAL J. SIMPSON can be found in FBI Laboratory reports previously submitted to your office. The results of other hair and fiber examinations and comparisons are included in copies of FBI Laboratory notes previously furnished to your office. The following information reflects Laboratory notes pertaining to your requests:

- Q4 - Q6: Head hairs like K7 (O.J. Simpson)
Negroid hair fragments (not suitable)
Cat hair
Wool fibers like cap (see report dated 1/5/95)
- Q9: White animal hair fragment (not suitable)
Several dark brown human hair fragments (not suitable)
- Q15: Dyed Caucasian head hair fragment (unlike knowns)
Blonde Caucasian head hair fragment (not suitable)
Brown Caucasian head hair fragment (not suitable)
- Q19: Light brown Caucasian head hair - treated
(unlike knowns)

(CONTINUED-OVER)

Q24: Blonde Caucasian head hairs like K4
White dog hair like K54
Cat hair
Green cotton fiber

Q25: White dog hairs like K54
Black dog fur hair like K53/Q149-Q159 dog hairs
Caucasian limb hair

Q27: Hair fragment (not suitable)
Negroid limb hairs
Negroid pubic hair
Negroid hair fragment (not suitable)
miscellaneous textile fibers

Q80 - Q81: Negroid limb hair
Head hairs/fragments like victims' knowns
Blue acrylic fiber like Q47 (knit hat)

Note: Q80 and Q81 represent LAPD item #285

Q84 - Q86: Previously reported

If I can be of further assistance to you, please let me know.

Sincerely,

Unit Chief
Hairs and Fibers Unit
Laboratory Division

Q221-Q232 Photographs from crime scene walkway

Result of examination:

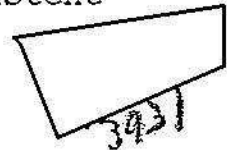

ENCLOSURE ATTACHED

Imprint patterns found on the right leg of RONALD GOLDMAN's blue jeans are like test imprint patterns produced by RONALD GOLDMAN's shirt (K75) and are consistent

56

(over)

b6
b7c

MAIL ROOM

This Report Is Furnished For Official Use Only

with having been produced by GOLDMAN's shirt. The imprint patterns found on the blue jeans; however, could not be positively associated with GOLDMAN's shirt.

Imprint patterns found on the envelope and piece of paper recovered from the crime scene are like test imprint patterns produced by RONALD GOLDMAN's blue jeans (K74) and are consistent with having been produced by GOLDMAN's blue jeans. The imprint patterns found on the paper and envelope; however, could not be positively associated with GOLDMAN's blue jeans.

No imprint patterns like those produced by RONALD GOLDMAN's shoes (K76) were found on the blue jeans, piece of paper or envelope.

The submitted items are being returned separately.

Goldman's blue jean exam (from photographs)

general description: heavily bloodstained - imprint patterns observed on right leg above knee and below knee (front)

The above-cited imprint patterns have been photographed and circled → on 1 X 1 black and white photographs and on color photo of jeans.

Several areas depict imprint patterns consistent with test imprint patterns from Goldman's shirt (K75)

Imprints on jeans enlarged 4X for detail.

Test imprint patterns show a couple of distinct patterns. These were marked Test Area A and Test Area B on overlays prepared from K75. Test area A has pattern exhibited on jeans.

Envelope: photograph of envelope provided by SA depicts imprint pattern in upper right hand corner of backside of envelope. This area is approx. $\frac{1}{2}$ " X $\frac{3}{8}$ " and the ^{ribbed} pattern measures $\sim \frac{1}{16}$ " between ribs.

b6
b7c

The test imprint patterns of Goldman's ^(K74) jeans are consistent with imprint pattern found on envelope.

Piece of paper: photograph of paper (from crime scene) exhibits imprint pattern consistent with Goldman's jeans test imprint

b6
b7c

For the information of the Bureau and receiving offices, FBI Laboratory Examiners have been able to conclude, through examination of bloody footwear impressions left at the SIMPSON homicide crime scene, that the murderer wore size 12 Bruno Magli, style "Lorenzo" or "Lyon", shoes. Both styles have the same tread pattern and sole, with the Lorenzo being a low cut lace-up boot style, and the Lyon being a standard lace-up style. The sole is a black rubber "cup sole" and the uppers are full leather. This shoe was made in Italy, retailed for \$160, and has very unique sole and tread characteristics, which allowed examiners to reach this conclusion with certainty.

Investigation has determined that this shoe is very unique and was only distributed between August 1990 and May 1993 to 40 retail stores in the United States. It was also determined that only 296 pairs of those shoes were size 12. It should be noted that some of the 40 stores, marked "Closeout", received unsold shoes from other stores for reduced price sales.

Investigation has also determined that O.J. Simpson wears size 12 shoes, and that Nicole Brown Simpson did own Bruno Magli shoes. The Los Angeles Police Department has requested FBI assistance in an attempt to locate records and witnesses regarding the sale of the shoes in question to anyone, specifically to SIMPSON or his ex-wife Nicole Brown Simpson.

REQUEST OF RECEIVING OFFICES

Inasmuch as the SIMPSON murder trial has commenced, expeditious coverage of leads set forth herein is requested.

Each receiving office is requested to contact the Bruno Magli retail distributor noted below and conduct the following investigation:

1. Under no circumstance should the interviewing agents mention that this investigation concerns O.J. Simpson or the homicide investigation in Los Angeles, California.
2. Interviewing agents should state that this is a routine investigation, and that they are attempting to track size 12 Bruno Magli shoes in style Lorenzo or Lyon.
3. Bruno Magli has furnished the FBI with order numbers, dates and the number of size 12 shoes received by each retail store. Agents should attempt to obtain any records of the receipt, sales or return of those shoes.

4. If the company has customer sales records, those records should be reviewed by agents in order to identify all purchasers of the shoes in question, specifically O.J. and Nicole Brown Simpson.

5. If the company does not have any records, agents should identify all salespeople and managers during the period in question. Those people should be interviewed in an effort to elicit their recollection of the sales of the shoes in question to anyone, specifically to any celebrities, or celebrity family members. If they mention Simpson or his ex-wife, treat that information as routine and note any other individuals that they mention.

6. Agents should also inquire about lists of regular customers on file, or the possibility of a company representative who handles celebrity accounts. If identified, the company representative can be interviewed as noted above.

SUBJECT : ORENTHAL, JAMES SIMPSON, AKA
O.J. SIMPSON;
HOMICIDE INVESTIGATION;
DPC;
OO: LOS ANGELES

Re airtel from Los Angeles to Director, Phoenix and other field offices, dated 10/4/94.

Enclosed for Los Angeles is 35 receipts from the BRUNO MAGLI SHOE STORE, 2542 East Camelback Road, Phoenix, Arizona 85016, telephone number (602) 956-6661. The enclosed receipts are either Lorenzo or Lyon type shoes sale records, and the receipts, with their SKU numbers begin with the number 365 and two additional numbers for the Lyon type shoe, and number 368 and two additional numbers for the Lorenzo type shoe.

These receipts are sent to Los Angeles with the credit card slips if possible, or names of the purchasers based on AMERICAN EXPRESS charge slip. It should be noted that some of the signatures are not legible, and therefore are also included due to the shoe types being bought by these individuals as set forth in lead from Los Angeles.

Los Angeles should also be aware that the BRUNO MAGLI STORE did not have the size shoe on their sales slips that are enclosed from Phoenix, so that is also another reason why all sales slips are being sent to Los Angeles.

SUBJECT: ORENTHAL JAMES SIMPSON, AKA O J SIMPSON; HOMICIDE
INVESTIGATION; DPC; OO: LOS ANGELES.

DUE TO THE INTENSE MEDIA INTEREST IN CAPTIONED MATTER,
AND THE POTENTIAL PREJUDICIAL IMPACT THAT PUBLIC DISSEMINATION
COULD HAVE ON PENDING CRIMINAL PROCEEDINGS, THE FOLLOWING
INFORMATION SHOULD BE HANDLED ON A STRICT NEED TO KNOW BASIS,
AND SHOULD NOT BE DISSEMINATED OUTSIDE THE FBI. ANY MEDIA
INQUIRIES SHOULD BE DIRECTED TO THE LOS ANGELES POLICE

DEPARTMENT (LAPD).

RE LOS ANGELES AIRTEL TO THE DIRECTOR, DATED 10/4/94.

REFERENCED AIRTEL SET FORTH LEADS IN APPROXIMATELY 40 RETAIL SHOE STORES ACROSS THE UNITED STATES AND PUERTO RICO, IN AN ATTEMPT TO TRACK THE SALE/PURCHASE OF BRUNO MAGLI STYLE "LORENZO" AND "LYON" SIZE 12 SHOES. IT HAS BEEN DETERMINED, THROUGH EXAMINATION OF BLOODY FOOTWEAR IMPRESSIONS LEFT AT THE HOMICIDE CRIME SCENE, THAT THE MURDERER WORN THE ABOVE DESCRIBED SHOES. AT THE TIME, THE LAPD REQUESTED THAT NO MENTION OF THE CAPTIONED INVESTIGATION OR THE NAME O J SIMPSON BE MADE DURING THE COVERAGE OF THE LEADS. THE INITIAL RESULTS OF THAT SEARCH FAILED TO DISCLOSE THE SALE OF THE PERTINENT SHOES TO CAPTIONED SUBJECT.

LAPD DETECTIVES AND LOS ANGELES COUNTY DEPUTY DISTRICT ATTORNEY [REDACTED] HAVE NOW REQUESTED THAT THE FBI ASSIST THEM BY RE-CONTACTING THE SAME 40 STORES AND ASK MORE SPECIFIC QUESTIONS. AGENTS ARE REQUESTED TO CONDUCT FOLLOW-UP INVESTIGATION AT THE RETAIL SHOE STORES LISTED IN REFERENCED AIRTEL. AGENTS SHOULD ADVISE THE APPROPRIATE STORE PERSONNEL THAT THIS MATTER CONCERNS CAPTIONED INVESTIGATION AND ASK IF

b6
b7c

PAGE FOUR DE FBILA 0011 UNCLAS

THE STORE HAS ANY RECORDS OR RECOLLECTION THAT O J SIMPSON SHOPPED THERE. IT SHOULD ALSO BE DETERMINED IF THE STORE MAINTAINS ANY TYPE OF CUSTOMER PROFILE LIST, OR A RECORD OF SHOE SIZES OF CUSTOMERS. A RECORD THAT SIMPSON WEARS OR BOUGHT SIZE 12 SHOES WOULD BE OF EVIDENTIARY VALUE, EVEN IF IT WERE NOT FOR THE ABOVE DESCRIBED BRUNO MAGLI SHOES. LASTLY, THROUGH REVEALING SIMPSONS NAME, AGENTS ARE REQUESTED TO DETERMINE IF THE STORE CAN SUBSTANTIATE A SALE OF THE BRUNO MAGLI SHOES TO HIM.

IF A SALE OF THE BRUNO MAGLI SHOES TO SIMPSON IS IDENTIFIED, LEAD AGENT SHOULD IMMEDIATELY CONTACT LOS ANGELES TO COORDINATE ADDITIONAL INVESTIGATION.

LEADS.

EACH RECEIVING OFFICE IS REQUESTED TO RE-CONTACT THE BRUNO MAGLI RETAIL SHOE STORE AS NOTED IN REFERENCED AIRTEL, AND CONDUCT INVESTIGATION AS REQUESTED ABOVE.
